

Why I “Take the Lead”

High Park is a special place. I love to come here with my dog! Sometimes we visit Dog Hill where my pet can run free and play with other dogs. Sometimes we walk along the part of Spring Road and nearby woodland trail designated as an Off-Leash Area where my pet can walk with me off-leash.

Everywhere else we go in this beautiful park, I am proud to “Take the Lead” and keep my dog on-leash, as required by City bylaws. This has so many benefits!

- I know where my pet is at all times.
- I never need to worry about unpleasant encounters with other dogs or wildlife
- It's easy to pick up after my pet.
- By staying on trail we don't trample vegetation, compact the soil, spread seeds of invasive plants or disturb the wildlife who call the park their home.
- Other people can approach and interact with my pet if we all feel comfortable, or keep their distance if they prefer.
- Children and seniors don't need to worry about my pet being overly friendly.
- By keeping my dog on-leash, I'm setting a good example for others.

High Park is one of the most significant natural areas in Toronto. It is known for its biodiversity and rare habitats, including the Black Oak Savannah and the Grenadier Pond Wetland Complex.

The park is vital to birds and other wildlife who live and pass through here. A major portion of High Park has been given special protected status by the City and the Province.

High Park is also very popular, with over a million visitors a year. If we all treat each other and the park with respect, we can help to heal and protect this precious place for everyone to enjoy, now and for years to come.

Will You Take the Lead Too?
